

# PMIP4-CMIP6 ice-sheet data

You will find on this page some of the boundary condition data that you have to use for

- [Last Glacial Maximum](#)
- [Last Deglaciation](#)

Please make sure to read the [HOWTO](#) section in order to use the data correctly!

Get in touch with the following people if you have questions:

<a href="#">Masa Kageyama</a>	LGM
<a href="#">Ruza Ivanovic</a>	Last Deglaciation
<a href="#">Didier Roche</a>	LGM, Last Deglaciation
<a href="#">Jean-Yves Peterschmitt</a>	Technical questions

## References

R. and Tarasov, L.: **Transient climate simulations of the deglaciation 21-9 thousand years before present, version 1; PMIP4 Core experiment design and boundary conditions**, Geosci. Model Dev., 9, 2563-2587, doi:[10.5194/gmd-9-2563-2016](https://doi.org/10.5194/gmd-9-2563-2016), 2016.

## How to use the data

- Choose the type of boundary condition you want to use. Look at the available data below, and at the [ice-sheet gallery](#) page.
  - Do not forget to document what you have chosen!
- Read the appropriate paper(s) in the [References](#) above
- After processing the boundary condition data, send a copy the BC data *as seen by your model* to [Jean-Yves Peterschmitt](#): netCDF file and plot

## Ice-sheet data

The input data for the boundary conditions is available in **netCDF files** provided by Dick Peltier and Lev Tarasov. You will find below some technical details about the data, and the related publications to cite

## Data history

The data files may change a bit (rename or standardize the data, etc...) and you will find the change list below

## Data

- [Peltier ICE-6G-C for PMIP4](#)
- [Tarasov GLAC-1D for PMIP4](#)
