PMIP4-CMIP6 ice-sheet data

You will find on this page some of the boundary condition data that you have to use for

- Last Glacial Maximum
- Last Deglaciation
- Penultimate Deglaciation

Please make sure to read the HOWTO section in order to use the data correctly!

Get in touch with the following people if you have questions:

Masa Kageyama	LGM
Ruza Ivanovic	Last Deglaciation
Didier Roche	LGM, Last Deglaciation
Laurie Menviel	Penultimate Deglaciation
Emilie Capron	Penultimate Deglaciation
Jean-Yves Peterschmitt	Technical questions

Past Discuss., https://doi.org/10.5194/cp-2018-106, in review, 2018

How to use the data

- Choose the type of boundary condition you want to use. Look at the available data below, and at the ice-sheet gallery page.

    - Do not forget to document what you have chosen!
- Read the appropriate paper(s) in the References above
- After processing the boundary condition data, send a copy the BC data *as seen by your model* to Jean-Yves Peterschmitt: netCDF file and plot

Ice-sheet data

The input data for the boundary conditions is available in **netCDF files** provided by Dick Peltier and Lev Tarasov. You will find below some technical details about the data, and the related publications to cite

Data history

The data files may change a bit (rename or standardize the data, etc...) and you will find the change list below

Data

- Peltier ICE-6G-C for PMIP4
- Tarasov GLAC-1D for PMIP4
