

PMIP4 GLAC-1D ice-sheet data

Grid

- nb_lat, nb_lon = 360, 360
- latitude_values = [-89.75, -89.25, -88.75, ... 88.75, 89.25, 89.75]
- longitude_values = [0.5, 1.5, 2.5, ... 357.5, 358.5, 359.5]
- time axis: see the *Time steps* section below

Time steps and data files

26 ka BP to 0

- 261 time steps in one file : data every 100 years, from 26k to 0k BP
- time_values = [-26. , -25.9, -25.8, ... -0.2, -0.1, 0.]
- all the variables and all the time steps are in the same file:
TOPicemsk.GLACD26kN9894GE90227A6005GGrBgic.nc

140 ka to 122 ka BP

- 37 time steps in one file : data every 500 years, from 140k to 122k BP
- time_values = [-140, -139.5, -139, ... -123, -122.5, -122]
- all the variables and all the time steps are in the same file: TopoIcem-140-122k.nc

Variables

- **HDC**: GLAC contemp. elevation(masl), meters
 - on continents (including ice sheets) and ice shelves: surface altitude (including ice sheets/shelves)
 - on ice-free ocean: bathymetry
- **HDCB**: GLAC contemp. elevation(masl), bathymetry for floating ice, meters
 - on continents (including ice sheets) and ice shelves: surface altitude (including ice sheets)
 - on ice-shelves: altitude of the bottom of the floating ice
 - on ice-free ocean: bathymetry
- **ICEM**: GLAC ice mask, fraction
 - ice fraction values between 0.0 (no ice) and 1.0 (100% ice)

Notes:

- The land-sea mask can be computed with:
 - $HDCB > 0$: ls_mask = 1 (land)
 - $HDCB \leq 0$: ls_mask = 0 (no land)
- Computing the HDC-HDCB difference yields:
 - ice-shelves thickness where there are ice shelves

- 0.0 everywhere else

Freshwater fluxes

Melt-uniform option

Check the [Download](#) section to access the `GLAC-1D_fwf_uniform.txt` data file

Melt-routed option

Download

You will find below a table with all the available data files, and their `md5sum` checksum (if you want to check that you download was OK, you can just type `md5sum file.nc` and compare the result to what is displayed in the table).

If you want to download a file, click on the [ice_sheet download link](#) and then on the file you need.
